

CLEVER TANK

Test Results Related to Strength & Physical Behavior With and Without Chemical Substances

The color lines represent the Clever Tank after constant exposure to aggressive chemicals and fluids for a 24-hour period.

Summary:

The integrity of the Clever Tank is 100% maintained and does not suffer any breakdown, failure or damage when exposed to corrosive chemicals for a 24-hour testing period.

Consistent contact with corrosive chemicals for longer than 24 hours may alter the integrity and strength of the Clever Tank and is not recommended. Please clean and rinse Clever Tank thoroughly after each use prior to long-term storage.
