

10 Requirements for Safe Pet Travel

In choosing a pet travel crate or harness that protects your pet, as well as other passengers, make sure it meets the following ten requirements:

- 1** Crash safety tested in all scenarios (front, rear and rollover)
- 2** Meets government auto safety testing standards
- 3** Uses tests conducted under real world conditions
- 4** Offers proven results in real accidents
- 5** Employs experienced engineers to design products
- 6** Works with vehicle safety design (crumple zones)
- 7** Doesn't rely on cargo hooks and straps for crash safety
- 8** Pet removal after a crash is quick and safe
- 9** Has a rear escape hatch if car's cargo door cannot be opened
- 10** Manufacturer is transparent and willing to answer questions
